Customized Payment Solutions

*From A Company
That Knows Parking!*

Provide your customers with unlimited payment options and convenience without the IT costs or development time.

Setup is fast and easy!

Benefits:

Increase cash flow. With automated debiting of credit cards and/or accounts, monthly income is booked and deposited into your account on the first of every month, automatically.

Reduce or eliminate fraud and theft by reducing/eliminating the access to cash/checks.

Reduce the cost and loss of returned checks, late payments and collection efforts. Providing your customers with optional payment solutions can dramatically reduce late payments and processing electronic checks eliminates returned checks entirely.

Reduce A/R balances with a wider range of payment options, more customers will pay on time.

Reduce labor & administrative costs by reducing the number of manually processed payments.

How It Works

We have developed an intricate design of web pages that allow your customers to log on, make certain selections and then make a payment via our secure web site. Funds are deposited directly into your bank account daily. You are then sent a report of all payments that have been processed. The transactions are posted in a batch to your account. This batching process makes reconciliation easier as opposed to individuals paying via their own bank methods. When individuals pay via their own bank web site or other check processing services, the deposits are posted to your account individually; making your bank reconciliation more difficult.

Your organization has the option of manually posting the payments directly into your current billing system or having the payments posted automatically via an interface. Through our affiliations, we can also assist in selecting a billing system designed specifically for the parking industry!

Our fees are based on the level of service that is provided. Our fees are low and are very cost effective for your organization considering the reduction in costs and the increased cash flow, as well as the reduction in AR.

Call us today! Set up is fast and easy.

Embrace Technology!

Give your customers a full menu of payment options

- Credit Cards
- Electronic Checks
- Autodraft/ACH

Your technological
key to success!
